I think this pattern was the shortest I've ever written. It is nothing difficult, just crocheting plain simple tiny cotton balls.

I went out to my overgrown garden (we had more than a fair share of rainy days this summer 😞) in search for a bear twig and I found one, pretty easily. It belonged to a Pretty Polly Plant. I only had to count the branches and make the same number of crocheted balls. I used Super Glue to stick them to the tips of the tiny branches.

### Conclusion

Nothing complicated, today. Japanese Beautyberries are done!
